

Permit 2007-012

University of Akron Field Station Permit Application

Field Name	Field Value
Name	Linda Whitman
Organization	CSAA
Phone	x6179
email	whitman@uakron.edu
Web_Address	http://www3.uakron.edu/anthro/csaa/index.htm
Renewal	Yes
Permit_Number	
Activity	Education
Project	Archaeology Field School 3240:450 - 402
Dates	6/6/07 - 6/22/07
Group_Size	10
Research_Area	Yes: Archaeology Area A, Archaeology Area B
Sensitive_Area	No
Other_Areas	No
Building	Yes
Prep_Work	I would like to store equipment in the garage as I have done in the past. I would need a key to the garage.
Sampling_Collecting	Yes
Sampling_Methods	We will be excavating, looking for evidence of a prehistoric occupation; hence, we may be collecting soil samples from archaeological features such as hearths, post holes, etc. and collecting lithic artifacts such as projectile points, tools, debitage and possibly pottery.
Description	This project is a continuation of archaeological research being conducted at the Bath Nature Preserve. During previous a investigation for the construction of the trails, several prehistoric sites were located. Archaeogeophysical surveys have been conducted at two of these sites as part of the course that teaches these geophysical methods. During the Summer of 2004, the archaeological Field School was conducted at the Garden Pond site. This summer I would like to field check the results of the Spring 2007 archaeogeophysical surveys at the Garden Pond site and at the Round Top site. This is if time and enrollment in the course allows for both sites to be investigated. The goal of the field school is to teach scientific archaeological excavation methods and

	techniques to interested students while continuing my research at the Preserve. Impacts to the Field Station would consist of equipment storage and impacts to the Bath Nature Preserve would be to the grassy areas where we excavate. Those areas will be reseed.
Agreement	Accept
