Sampling_Methods	We may collect some field samples to examine in class. Samples would be plant material, fungal material, and protist material (from ponds).
Description	Proposed activities: We will walk around examining the available plant material in different areas. Some collections will be made for closer examination in lab. Goals: To provide students with a greater appreciation of plant diversity and plant lifestyles and a hands-on experience with plant material. Impacts: Impacts will be minimal; we will only collect material that is abundant.
