Other_Areas	Yes
Public_Areas	Yes
Building	Yes
Prep_Work	
Sampling_Collecting	Yes
Sampling_Methods	We will be collecting fungal specimens for class material. Collections will be limited to 10 fungal specimens of each type.
Description	As part of the Mycology (study of fungi) course at the University of Akron, students will collect fungal specimens and identify them. This exercise is geared to toward teaching students how to identify fungi, demonstrating the biodiversity of fungi, and illustrating the ecological importance of fungi. All fungi identified will be added to the Field Station fungal species list. Impacts of collections will be minimal since only part of the fungal organism will be collected.
