Sampling_Methods	I wouldn't term any collecting as destructive, as I plan on only taking one plant specimen per species. The specimens will be dried and mounted on museum quality mounts for the KSU Herbarium, thus making them non-returnable.
Description	I will be studying the wetland for a lab project that entails describing and delineating the wetland, taking a biotic survey, collecting plant specimens, and writing an assessment of the area which will include a function versus value comparison.
