Building	Yes
Prep_Work	I will handle all preparation
Sampling_Collecting	No
Sampling_Methods	
Description	I will grow approximately 100 potted Mimulus ringens (monkeyflower) plants south of the field station in the grassy area north of Ramsey's. The plants will be tended daily, and surrounded by a temporary deer barrier; probably on temporary benches as well to prevent rabbit damage. For a month or so there will also be a pollinator exclusion tent (~12x12\') in place as well.
