Description	As an educator in the sciences I wish to expose my student population to the joys and wonders of the outdoors and nature areas to learn more about and gain an appreciation for natural areas as well as Ohio's flora and fauna. Field trips will be used to take students on nature walks and learn about habitats, identity of flora and fauna on the preserve, and learn how field stations can be used by those studying science. Hopefully, students will gain knowledge and an appreciation for the study of science and perhaps consider a career in a scientific field of interest.
