Sampling_Methods	Students will collect and kill insects in all areas of the preserve (and at Panznern and Steiner Woods) following standard methods (usually via nets, jars, and temporary traps).
Description	Observe and Collect insects, to provide students with an understanding of

	the diversity of insects. Impacts should be minimal. Students will remove only a tiny fraction of the existing insect populations. Experience has shown that these collections and this intensity of collection will not affect local populations. Sampling will not destroy habitat nor impact preservation values
