No

I am requesting permission to use areas outside of the designated Research or Sensitive Areas.

No

I would like to use the Martin Center for Field Studies and Environmental Education for this prop...

No

Will the activity involve destructive sampling/collecting?

No

Provide a brief description of (1) your proposed activities, (2) goals, and (3) impacts of your u...

Our Medina City School District has implemented what is called Portrait of a Bee. One of the competencies is to be a Resilient Lifelong Learner. In this competency, students explore their own interests. Our fifth grade students have been researching a topic of their choice in our Science units. Some chose an organisms in the park, some chose a planet, others chose Native Americans or sound (tunnel at the park). This project acts as a springboard to all of our units of studies in Science. Throughout the year, we will be able to reflect back on this research project. Along the path from Bath Nature Preserve to the Bath Community Park, at different stops, students will be presenting their

research to their peers. Classes of 23 will start out at different times on the trail so we are not in a large group along the path.

By checking this box, I agree to the above terms and state that all of the above information is c...
