Yes

Will the activity involve destructive sampling/collecting?

No

Which Research Areas?

18 Acres
Beefy's Woods
Garden Pond
Grandview Alley
Round Top
South Woods

Please indicate any preparation or set-up you will need in the Martin Center for Field Studies an...

Primarily staging for equipment on nights of active mapping

Provide a brief description of (1) your proposed activities, (2) goals, and (3) impacts of your u...

Brief, after-hours site visits to capture short-form video documentation of our temporary digital media installation Virtual Volume. Over the course of 2 to 3 evening hours, we will set up compact, battery-powered projection and audio equipment to map real-time, audio-reactive visual patterns directly onto natural surfaces—specifically Bath Pond, the immediate forest tree line, and North Fork Creek. The work uses non-invasive digital projections and low-volume sound cues to modulate visuals live for video recording.

Goals: Capture compelling, high-quality video and photography of digital media interacting with natural fluid dynamics on water and forest surroundings.

Disseminate the captured documentation across studio web platforms and social media channels to expand audience reach, gain followers, and spotlight innovative intersections of art, technology, and ecology.
